Problem of Practice

The background of the slide features a dark, moody photograph of a person's hand holding a pen, poised to write on a laptop keyboard. The lighting is soft, highlighting the contours of the hand and the keys. A large, semi-transparent green geometric shape, resembling a stylized arrow or a large 'P', is positioned on the right side of the image, pointing towards the center. The text 'Problem & Literature Review' is overlaid on the left side of the image.

Differentiated **Coaching**

Purpose Statement

To test a Guided Pathways framework positioned in a complex adaptive system to determine the relationship between differentiated coaching, as deployed in student success programming through the Guided Pathways initiative, and retention for associate degree seeking or general transfer students who have completed at least thirty credit hours at Chaparral Community College.

Methodology

Guided Pathways: Stay on the Path, Ensure Learning

**Classroom
Experiences**

**Success
Programming
Experiences**

**Academic
Integration**

Research Design

Binary Logistic Regression

$$P(\gamma) = \frac{1}{1 + e^{-(b_0 + b_1x_{1i} + b_2x_{2i} + b_3x_{3i})}}$$

Population Sampling

Students who met four criteria:

- classified as associate degree seeking or general transfer,
- non-dual credit,
- completed a minimum of 30 cumulative credit hours, and
- had not completed a degree or certificate

Two groups:

- Control “pre-treatment” - students who enrolled in and completed coursework in the Fall 2018 semester (N = 585)
- Treatment “post-treatment” - students who enrolled in and completed coursework in the Fall 2020 semester (N = 465)

Variables

Type	Name	Description
Dependent	Retention	Retained by enrolling in subsequent term(s), completion of degree or certificate, or transfer
Independent	Group	Control—group of students completing Fall 2018 semester not receiving differentiated coaching; Treatment—group of students completing Fall 2020 semester receiving differentiated coaching

Variables

Type	Name	Description
Predictor	Cumulative Grade Point Average	Cumulative grade point average at completion of cohort semester
Predictor	Cumulative Credit Hours Earned	Number of cumulative credit hours earned at completion of cohort semester
Predictor	Enrollment Status	Enrollment status at completion of cohort semester (full-time \geq 12 credit hours)

H_0

There is **no relationship** between differentiated coaching, cumulative grade point average, cumulative credit hours earned, and enrollment status and predicted log odds of student retention (Y).

Hypotheses

H_1

There is a relationship between differentiated coaching, cumulative grade point average, cumulative credit hours earned, and enrollment status and predicted log odds of student retention from semester one to semester two (Y).

H_2

There is a relationship between differentiated coaching, cumulative grade point average, cumulative credit hours earned, and enrollment status and predicted log odds of student retention from semester one to semester three (Y).

Hypotheses

Overview of Findings

Ensure Students are Learning

Cumulative Grade Point Average

Model 1 - Semester 1 to 2

- 1.85 times more likely to be retained
- positive & significant
($b = 0.614$, $SE = .109$,
 $p < .001$)

Model 2 - Semester 1 to 3

- 1.88 times more likely to be retained
- positive & significant
($b = 0.633$, $SE = .101$,
 $p < .001$)

Keeping Students on the Path

Cumulative Credit Hours Earned

Model 1 - Semester 1 to 2

- Increase in 1 credit hour earned, decrease of 10% in odds of retention
- negative & significant
($b = -0.010$, $SE = .003$, $p = .003$)

Model 2 - Semester 1 to 3

- Increase in 1 credit hour earned, decrease of 11% in odds of retention
- negative & significant
($b = -0.011$, $SE = .003$, $p < .001$)

Keeping Students on the Path

Enrollment Status

Model 1 - Semester 1 to 2

- 2.53 higher odds to be retained than part-time students
- positive & significant
($b = 0.928$, $SE = .188$,
 $p < .001$)

Model 2 - Semester 1 to 3

- Not statistically significant
- positive
($b = 0.141$, $SE = .030$,
 $p = .301$)

Guided Pathways Pillars of Analysis:

**Keeping Students on the Path,
Ensure Students are Learning**

Differentiated **Coaching**

Model 1 - Semester 1 to 2

- Not statistically significant
- positive
($b = 0.169$, $SE = .160$,
 $p = .293$)

Model 2 - Semester 1 to 3

- **1.51 times more likely** to be retained
- **positive & significant**
($b = 0.411$, $SE = .130$,
 $p = .002$)

The background of the slide features a dark, moody image of a hand holding a pen, poised to write on a document. The image is dimly lit, with the primary light source being the text itself. A large, bright green triangle is positioned on the right side of the slide, pointing towards the center. The text is arranged in two lines, with the first line in white and the second line in a vibrant green that matches the triangle's color.

Implications & **Distribution Plan**

Alignment

Difficult Cognitive Elements	Why Difficult?	Common Errors	Cues and Strategies Used
Assessing whether the student's assigned student success pathway makes sense, including time to completion	<ul style="list-style-type: none">▪ Advisors tend to focus on basic facts, degree plans only▪ Students reluctant or not knowing how to share pertinent information; are hesitant to make career/pathway decision	<ul style="list-style-type: none">▪ Don't recognize or investigate for potential barriers▪ Focus exclusively on information presented by student	<ul style="list-style-type: none">▪ Consider whether you really know all the "layers" of the student story▪ Use motivational interviewing techniques to get students talking to elicit information beyond that which was initially presented

Development

COURSE SCHEDULE ADVISING

FROM:

- We do this because we were told.
- We do this just because.
- We do this inconsistently (as individual or group).

Advising defined: offer suggestions about the best course of action to someone.

DIFFERENTIATED COACHING

TO:

- We do this because we have an understanding of our students needs and are striving to make a difference.

Coaching defined: process that aims to improve performance...unlocking a person's potential to maximize their own performance. It is helping them to learn rather than teaching them.

CONSISTENT
