Thumbs Up, Thumbs Down

Agenda

10:00 AM - 10:45 AM

Welcome, Who We Are, State of Student Parents

10:45 AM - 12:15 PM

Walk in a Scholars Shoes

12:15 PM - 12:45PM

Lunch

12:45 PM - 1:15PM

Supporting Student Parents Through Graduation

1:15PM - 1:30 PM

Q and A

Norms and Parking Lot

Norms

- During discussions, value other participants' contributions.
- Be engaged, but do not dominate the discussion.
- Avoid multitasking. Mute your electronic devices.
- All responses are valid; there are no right or wrong answers.

Mission and Impact

Our Mission

To ensure all student parents have the opportunities to succeed and experience economic mobility, Generation Hope engages education and policy partners to drive systemic change and provides direct support to teen parents in college as well as their children through holistic, two-generation programming.

GENERATION
HOPE

Our Work

Direct Services

- Helping teen parents earn college degrees
- Ensuring their children thrive in elementary school
- Resulting in a two-generation, holistic model

Systems Change

- Providing technical assistance to colleges and universities, called FamilyU
- Implementing student-driven policy and advocacy
- Releasing research and reports

Our Impact

Fewer than 2% of teen mothers earn a college degree before age 30.

Generation Hope's Scholars graduate at a rate that exceeds the national average for ALL college students whether they are parenting or not.

COMPLETION

92% of Scholars stay in college and in our program, or graduate, year-to-year.

PERSISTENCE

95% of Scholars say their mental health has improved as a result of Generation Hope's mental health counseling.

MENTAL HEALTH

Our Scholars' post-grad employment rate is 10 points higher than the average for all college graduates in our region.

EMPLOYMENT

100% of the children in Next Generation Academy were "on track" for their age group in cognitive development after 1 year in the program.

FAMILY SUCCESS

State of Student Parents

National Student Parent Demographics

of college students
across the US are
student parents

student parents have
higher GPAs on average
than their non-parenting
peers

of student parents are
mothers

are single
mothers

But this doesn't tell the complete story....

slido

In a Generation Hope survey of 259 student parents, what % of student parent respondents said they felt somewhat disconnected or very disconnected from their college community?

① Start presenting to display the poll results on this slide.

Student Parent Data Point #1

Disconnected from their college community

- Nearly half of respondents said they felt somewhat disconnected or very disconnected from their college community,
- 40% indicated that they agreed or strongly agreed that they felt isolated as a parenting student on their campus.

Question(s) to consider

- What are ways that your campus is more inclusive of parenting students in campus life?

slido

What percentage of respondents indicated they felt somewhat unwelcome or very unwelcome on their campus?

① Start presenting to display the poll results on this slide.

Student Parent Data Point #2

Unwelcomed on Campus

- Overall, 20% of respondents indicated they felt either somewhat unwelcome or very unwelcome on their campuses: Broken down by race, 30% of parenting Black students and 25% of parenting Hispanic and Latino students feel either somewhat unwelcome or very unwelcome, compared to 16% of parenting White students.

Question(s) to consider

- What are the ways that your institution includes parenting students in campus life?

What percentage of respondents said that their financial aid office did not inform them that childcare expenses could be taken into account in the determination of their financial aid award?

Student Parent Data Point #3

Student services aren't designed for student parents

- Securing child care was one of the most difficult challenges student parents reported facing. And yet, three-quarters of respondents said that their financial aid office did not inform them that childcare expenses could be taken into account in the determination of their financial aid award. That number increases to 79% for Black students.

Question(s) to consider

- What is your institution's process around professional judgement for childcare costs?
- How can your institution provide student parent-specific training to members of the financial aid team?

slido

What percentage of teen mothers earn a college degree before age 30?

① Start presenting to display the poll results on this slide.

Student Parent Data Point #4

Student parents are not persisting

- Fewer than 2% of teen mothers earn a college degree before age 30, and more than half of all parenting college students leave school without a degree.

Question(s) to consider

- What do intentional retainment practices for student parents entail?

slido

How many adults with some college credit, but not a degree, are also parenting?

① Start presenting to display the poll results on this slide.

Student Parent Data Point #5

Student parents are a large portion of the some-college-no-degree population

- More than one-third (35 percent) of adults who earned some college credit, but not a degree, are parents of children under 18.
- Students with children are nearly twice as likely to leave college before graduating than students who are not parents:
- Over half (52 percent) of student parents suspend their enrollment within six years without returning to complete their education, compared with 29 percent of all students without children.

Question(s) to consider

- What strategies can we employ to re-engage student parents, specifically?

slido

**What percentage of single fathers
stop-out at public, four year institutions?**

① Start presenting to display the poll results on this slide.

Student Parent Data Point #6

Fathers are more likely than mother to stop-out of college

- Single fathers (71 percent), Black and Latino fathers (72 percent and 66 percent, respectively), and fathers at public four-year institutions (70 percent) experience higher stop-out rates than student parents overall, student mothers, and other student fathers.

Question(s) to consider

- What is your specific plan to retain fathers at your institution?

slido

In 2019, how many student parents were identified, nationally?

① Start presenting to display the poll results on this slide.

Student Parent Data Point #7

It's likely that nearly 20% of your student body is parenting.

- According to a report published by IWPR, more than 19.5 million college students nationally – around 22% (4.3 million) – are also parents. Within that group, 55% are single parents, and 71% are women, according to a United States Government Accountability Office report from August 2019.

Question(s) to consider

- How is your institution collecting and disaggregating student parent data?

The Landscape

Why now?

- The COVID-19 pandemic has exacerbated the needs of student parents, especially those who have low-income
- Recent passage of state-level, student parent data collection bill in Oregon and Illinois; legislative drafts in California
- Expansion of the Child Tax Credit benefit
- Expansion of Higher Education Emergency Relief Fund (HEERF) emergency federal student grant aid to include DREAMers and international students

But what are we missing.....

DATA: The lack of student parent data creates a blind spot across our higher education system that creates a large blind spot in colleges' ability to improve student parent outcomes.

Break

Walk in a Scholar's Shoes

Walk in a Scholar's Shoes Activity

Instructions

- Open your envelope to read your student parent profile.
- Using that profile, walk around the room and choose the path you would take by making decisions that will impact your future.

Duration

- 30 mins:
Walk around the Room
- 35 mins:
Large Group Reflection and Share Out

Group Assignments

Large Group

Large Group Reflection

In your group, please discuss the following questions:

Reflections:

1. What are the historical and structural barriers you identified in the activity?
2. How did systems work for or against you in this scenario?
3. Why might a student parent be hesitant to talk about what's going on here or seek out help?
4. What could a support person do to help in this scenario?

Lunch Break

12:15- 12:45 PM

Back of Room - Regency Foyer Buffet
Front of Room - Arboretum Foyer Buffet

A woman in a graduation gown and a young boy are standing in front of a large window, looking out at a landscape. The woman is on the right, wearing a dark gown with a blue and white sash. The boy is on the left, wearing a striped shirt. The scene is overlaid with a purple tint.

Welcome Back!

Family U Approach to Capacity Building

race equity lens

At the systemic level it emphasizes the overall policy framework in which individuals and organizations operate and interact with the external environment.

At the institutional level it focuses on the overall organizational performance and functioning capabilities, as well as the ability of an organization to adapt to change.

At the individual level, capacity building refers to the process of changing attitudes and behaviors-imparting knowledge and developing skills while maximizing the benefits of participation, knowledge exchange and ownership.

Core Competencies for Student Parent Success

Data

Create a more comprehensive and utilitarian student parent-centered data collection system.

In addition to walking you through best practices, we will connect you with experts on how to enhance your data collection methods and provide recommendations based on their lessons learned.

Policy

Analyze institutional policy using a student-parent lens, develop a plan to amend policies that negatively impact student parents, and create policies to help this population thrive.

We will also encourage you to think strategically about integrating state and federal policy into your student parent supports.

People

Assess the staff, faculty, and administration's knowledge of student parents and identify strategies to increase awareness, training, and understanding that will lead to transformative support.

We will walk you through individual practices that can either marginalize or encourage student parents.

Culture

Develop and implement strategies that foster a welcoming environment for student parents.

From the physical campus environment to the unspoken traditions or practices that define a culture, we will partner with you to unpack what messages you are sending to parenting college students each day.

At Generation Hope, we define racial equity as both an outcome and a process. As an outcome, we achieve racial equity when race no longer determines one's socioeconomic outcomes; when everyone has what they need to thrive, no matter where they live. As a process, we apply racial equity when those most impacted by structural racial inequity are meaningfully involved in the creation and implementation of the institutional policies and practices that impact their lives. (Race Forward)

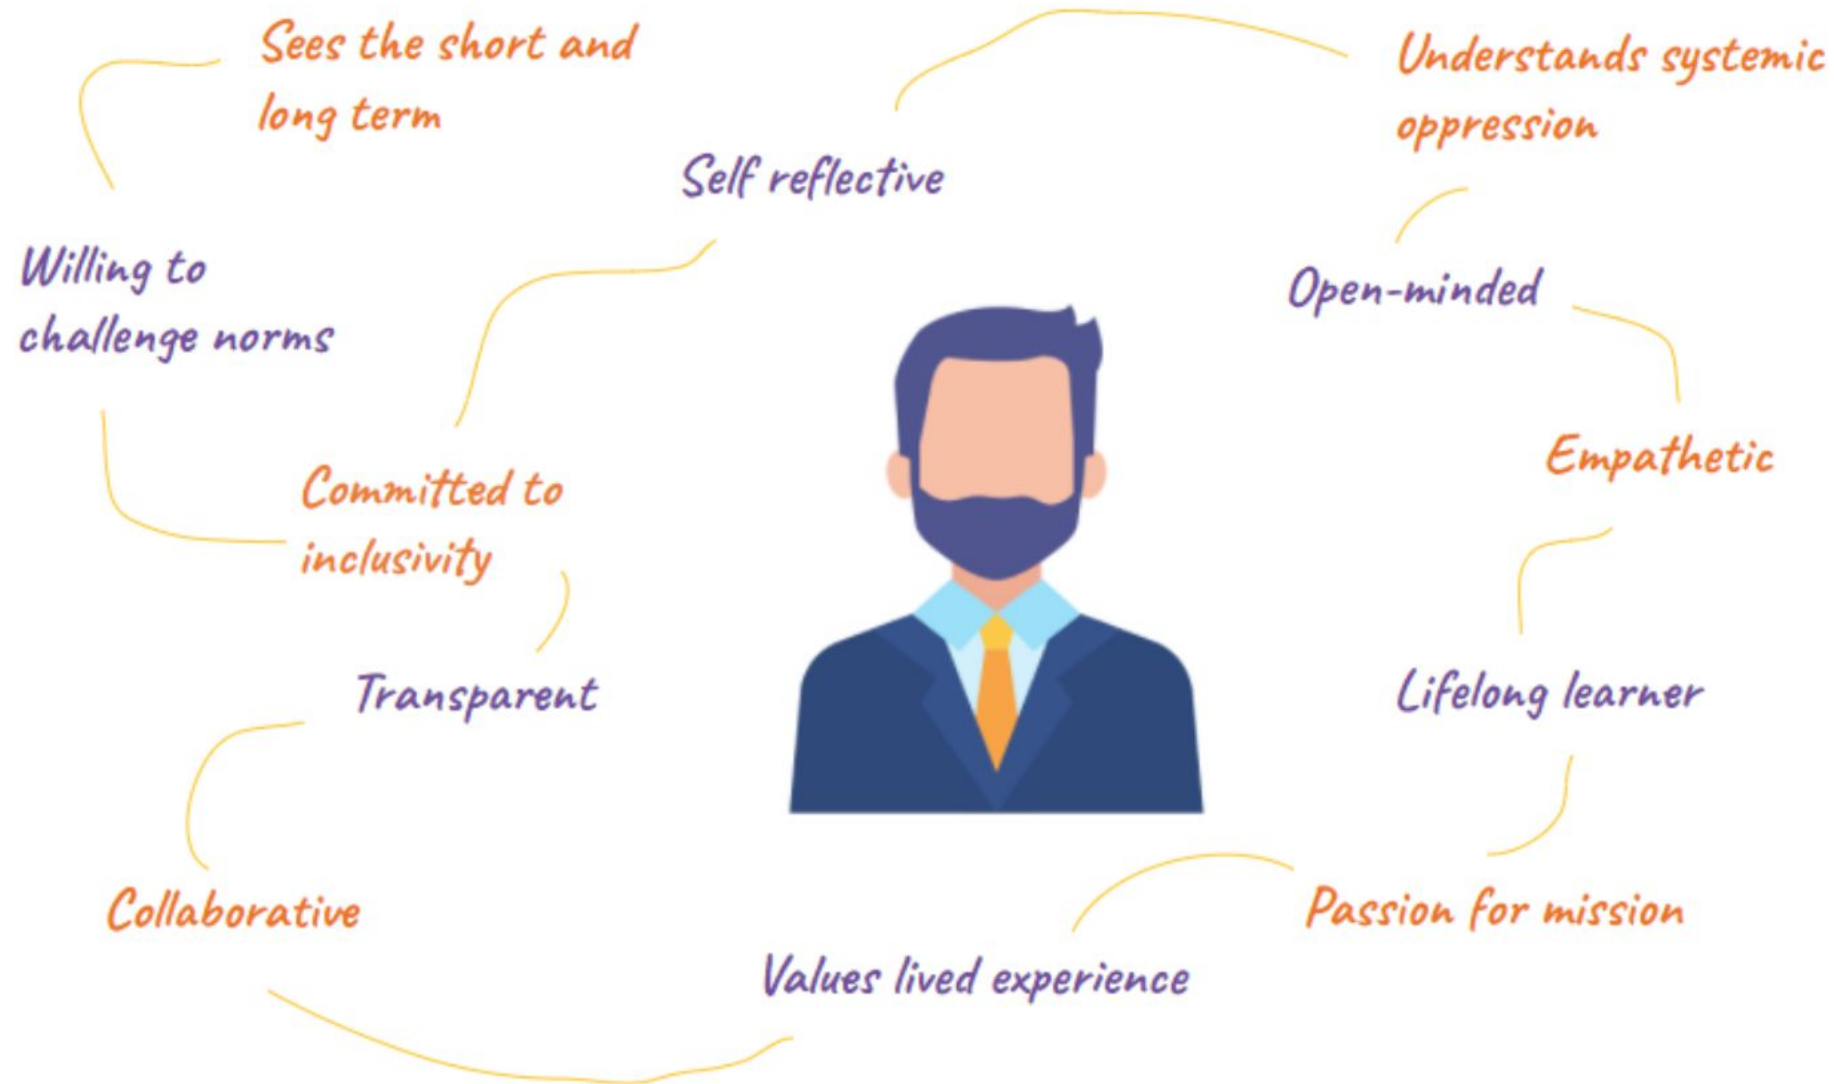

Data Collection In Practice

	TIPS
Before Collection	<ul style="list-style-type: none">• Gain buy-in from leadership; Educate the people in positions to help. Educate beyond childcare only conversations. Use your data to help continue to educate/ encourage leadership.• Spread the word! Present to staff/faculty so that they also encourage buy-in• Identity student-parents formally under the DEI (Diversity, Equity, and Inclusion) umbrella• Technology suggestions: Apricot through Social Solutions; TutorTrac; Airtable/Excel• Use the FASFA data to get started (e.g., parental and marital statuses)• Don't fear FERPA; partner with research offices/staff on campus
During Collections	<ul style="list-style-type: none">• Don't ask student parents questions without follow-up (e.g., sharing resources with them, etc.)• Don't overburden students by asking the same questions over and over
After Collection	<ul style="list-style-type: none">• Consider creative solutions: Tutors at the family-friendly center; family-friendly spaces in the library; hybrid/remote learning; parents don't leave the family-friendly buildings w/out their kiddos• Work with student parents to help them have a seat at the table (e.g., participating in student gov, etc.)

Student Parent Policy in Practice

Applying a Student Parent Lens to Policy Creation	Guiding Questions/Considerations
Policy Design & Intention	<ul style="list-style-type: none">• What is the true, intended purpose of this policy? What is the issue it aims to solve or the challenge it seeks to address? What is it NOT intended to do?• Was this policy designed with student parents in mind? If so, how? If not, what is missing?• If there are restrictions, time limits, eligibility requirements, procedures that are embedded in the policy, are they needed? Why or why not?
Policy Impacts & Outcomes	<ul style="list-style-type: none">• How does this policy impact student parents? Is it fulfilling its intended purpose for them? Why or why not?• What unintended outcomes does this policy have on student parents? On their children?• Does the policy consider how outcomes may differ for student parents when disaggregated by race, ethnicity, gender, socio-economic status, marital status, etc.? If so, how? If not, what needs to be changed?• How are the policy's outcomes being tracked and are they being tracked in an equitable way?• Does this policy create unnecessary burdens, time, or paperwork that can be particularly challenging for student parents?
Policy Inclusiveness	<ul style="list-style-type: none">• Will the policy have a positive impact on inclusion and participation of student parents in its design, implementation, communication, process, etc.?• Will the policy protect student parents from being discriminated against, marginalized, or treated harshly? How?

Student Parent Champion Qualities & Characteristics

Student Parent Support Techniques

Role	Abilities Put Into Practice
Senior Leadership	<ul style="list-style-type: none">• Prioritize student parent work and view student parents as assets to the environment• Regularly discuss institutional decision-making through a student parent lens and incorporate this population in discussions about a more inclusive culture• Speak about student parents – and their connection to race, culture, and structural racism – both internally and externally• Gather data on parenting status of students and analyze disaggregated data to connect it to root issues
Faculty	<ul style="list-style-type: none">• Are aware that student parents are a part of the campus community and are willing to be flexible with institutional norms in order for all students to succeed• Communicate proactively about parenting responsibilities in class syllabi and other messages to students and colleagues• Assess needs of students through surveys to better understand life challenges and respond• Create a positive environment where students feel they can disclose parenting status without experiencing negative consequences
Staff	<ul style="list-style-type: none">• Be willing to review/change institutional policies and norms that might marginalize student parents• Ensure that student parents have equal access to educational and social opportunities by removing unnecessary barriers and considering their caregiving needs• Hold team members accountable to ensure progress of student parent work

Culture in Practice

- **2020/2021 Higher Ed Toolkit for Supporting Student Parents (September 2020)**
 - Key recommendations for this academic year
 - Establishing and reducing barriers to emergency aid
 - Asynchronous Learning
 - Family-Friendly Syllabi
 - Welcome email that includes parents
 - Enhancing supportive services
 - Building community
 - Offering virtual supports
 - Creating as much certainty as possible for student parents

2020/2021 HIGHER ED TOOLKIT FOR SUPPORTING STUDENT PARENTS

As colleges and universities welcome students back this fall, whether in-person, online, or with a hybrid model, it is imperative that they consider the needs of parenting students. Although one in five college students is parenting nationwide, student parents remain a largely invisible population. The vast majority of institutions do not track parenting status and therefore do not know how many student parents they have at any given time or how to ensure their success. Because most colleges and universities were not addressing the very real needs of this population prior to COVID-19, meeting those needs, which have now been exacerbated by the pandemic, is even more difficult.

In May 2020, *Generation Hope*, a nonprofit organization that helps teen parents earn their college degrees while also helping their children get ready for kindergarten, in partnership with *Imaginable Futures*, *Cherry.org*, the *Institute for Women's Policy Research*, and *The Hope Center for College, Community, and Justice*, launched a national student parent survey to gain insight into the higher ed experiences of parenting students. A report of the findings and recommendations, entitled "*Uncovering the Student Parent Experience and Its Impact on College Success*," sheds light on an incredibly tenacious and driven student population that often feels unwelcome and disconnected as a result of significant gaps in institutional culture, policies, and physical space. While the survey was conducted prior to the pandemic, the report contains valuable insights for helping colleges and universities consider the needs of this population in their COVID-19 response plans.

To further assist institutions during this time, Generation Hope has compiled this toolkit with the support of *The Seldin/Haring-Smith Foundation* to highlight the top 10 things colleges can do to ensure their 2020/2021 academic year plans are considering the needs of student parents. The toolkit is informed by a focus group held in July 2020 with five Generation Hope Scholars, all teen parents attending two- and four-year colleges, as well as observations in our case management, mental health services, career support, home visiting, tuition assistance, and now virtual trainings provided to 80 Scholars attending 30 two- and four-year schools since the pandemic began in March. During the pandemic, our wraparound, tailored supports helped 95% of our Scholars successfully complete their spring semester, and 95% earn GPAs of 2.5 or higher.

QUICK STATS ON STUDENT PARENTS

FamilyU Cohort Overview

Cohort Model: 5 institutions in each cohort, 5 representatives from key departments at each institution

Year 1 <i>Assessment, Information Sharing, Customized Work Plan Development</i>	Year 2 <i>Implementation Support, Evaluation</i>
Examining and discussing 4 core components: 1. Data 2. People 3. Policy 4. Culture	<ul style="list-style-type: none">• Progress reports and support for implementation phase• Introduction and training of Student Parent Fellows• Report outs on deliverables, celebration, etc.

Cost	Installment	
	Year 1 (per. inst)	\$10,000
	Year 2 (per. inst)	\$10,000
*Please note that these fees will be waived for HBCUs		

2022 FamilyU Cohort Application Open Now!

- Helping colleges and universities increase their capacity to better serve student parents
- 4 -5 Institutions are selected from a national pool
- **2022 Application Cycle Closes on May 13, 2022**

Generation Hope 2022 FamilyU Cohort Application

Thank you so much for your interest in the 2022 FamilyU Cohort! The FamilyU Cohort is a comprehensive, customized, evidence-based, two-year capacity-building experience designed to build and refine institutional competencies to improve student parent success. In partnership with institutional staff and student parents, colleges and universities participate in peer learning convenings and campus-focused independent coaching sessions.

Through FamilyU, partner institutions will fundamentally shift the higher education system for student parents by:

- Improving data collection methods and tools to better track the parenting status of your students.
- Increasing awareness of the student parent population enrolled at your institution and their needs for college completion by cultivating studentparent champions at your institution to galvanize systems-change efforts.
- Boosting student enrollment, retention, and completion rates at your institution by developing and implementing racially equitable, parent-friendly policies at all levels on your campus to help students thrive.
- Deepening relationships with peer institutions and field experts working to improve student outcomes.

We are now accepting applications for our 2022 Cohort. Through the application process, we will select five institutions to engage in this unique capacity-building opportunity.
