

Community colleges redesigned the student experience through Texas Pathways. This important work included designing and implementing advising systems and structures to support each student to progress along their pathway and gain momentum towards further education or entry into the workforce.

By Fall 2022, nearly all colleges had designed and implemented proactive and systematic advising structures, and ensured advisors and students received timely alerts about program progress and available supports.

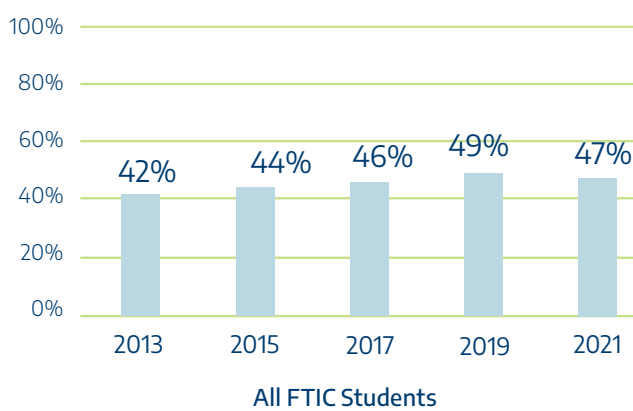

Proportion of Colleges at Each Level of Scale, N = 48

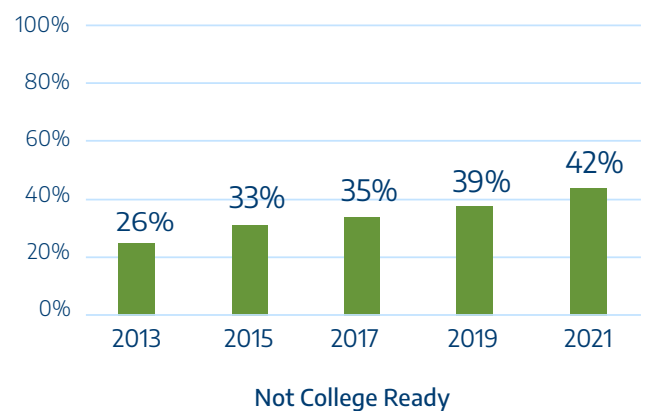

More students earned 15 or more college credits in the first year!

Thousands more students deemed not college ready earned 15 or more college credits in the first year!

Proportion of FTIC Students Earning 15 or More College Credits in Year 1*

Proportion of FTIC Students Earning 15 or More College Credits in Year 1*

Many more students gained early momentum towards their goals when supported by proactive advising during their journey!

The Texas Success Center measures the progress of Texas Pathways using the Scale of Adoption Assessment. Practice 3A measures systematic proactive advising structures and 3C measures proactive alerts for advisors and students. TSC partners with the THECB to collect KPIs that measure fall cohorts of first-time-in-college, degree-seeking students not including dual credit students. For more information, visit tacc.org/tsc.

* The Fall 2021 cohort data reflects the impact of the COVID-19 pandemic.
