Introduction

Prior to the 78th Legislative Session, the Texas Association of Community Colleges (TACC) adopted four legislative priorities:

- ◆ **Formula Funding.** The Legislature should maintain the current level of funding for the formula plus provide an adjustment for enrollment growth and inflation. TACC supports the Texas Higher Education Coordinating Board exceptional item request for *Closing the Gaps*.
- ◆ **Workforce Development.** As the primary provider of workforce development and training, Texas public community and technical colleges' efforts to meet this critical need should be enhanced by increasing the appropriation for the Skills Development Fund and funding the High Priority Program Development Fund.
- ◆ **Annexation.** The Legislature should provide community college boards with an additional method to pursue annexation of their legislatively designated service areas.
- ◆ **Deregulation.** The Legislature should pass legislation to ease certain regulatory burdens on the colleges in order to enhance the ability of the colleges to function more efficiently in meeting the needs of students and taxpayers.

Each of these legislative priorities is discussed in the first section of *Session Highlights*. The second section of this document provides summaries of several bills that have a direct effect on community colleges. The third section highlights other legislation which will have some affect on community colleges. The fourth section provides a list of bills that passed this session which might be of interest to various segments of the community and technical college community. The final section lists selected bills that did not pass the 78th Legislature in which TACC had an interest.

- The Legislature appropriated \$1.59 billion to the community and technical college formula, a decrease of \$79.6 million from the previous biennium (4.7-percent decrease).
- The 2004-05 appropriation for community colleges represents 52-percent of the full formula.
- The Legislature funded community colleges, the Texas State Technical System, and the Lamar State Colleges at different formula rates.
- Growth in the base year of community and technical college contact hours for 2004-05 was 13.6-percent. Enrollment growth in the base year for the last biennium was 5.7-percent.
- The appropriation to community colleges for 2004-05 is equivalent to the 1994-95 appropriation community colleges received. The chart below is based on dividing the formula appropriation for a given biennium by the base period contact hours. For 2004-05, \$6.43 was appropriated per contact hour, the same amount appropriated in 1994-95.

- In 2002-03, \$7.71 was appropriated to community colleges per contact hour. The \$6.43 amount for 2004-05 represents a 16.6-percent decrease in state appropriations.

- A comparison of the state appropriation per full time student equivalent (FTSE) yields a similar result; the community college appropriation is 16.6-percent less in 2004-05 than 2002-03 (see chart below).
