- Upgrade Recorder
  - Deluxe + Hosting + Secure Backup

Do you want to run or save WebLaunchRecorder.exe (339 KB) from screencast-o-matic.com?
I know that many of you are overwhelmed at the thought of getting your classroom material online in such a condensed amount of time and so I wanted to offer step by step instructions on a platform that I’ve used over the past two years. ScreenCast-O-Matic has been an excellent resource. I record my lectures and it allows the students to play them when they’re driving in the car to clinicals or when they’re at home studying. I mention that so that maybe you can go into this with the mindset of developing those lectures online as an additional resource for future semesters not just to get you by the semester.

The first thing you will want to do if you are interested in using this platform is to type in ScreenCast-O-Matic.com.
How do I put my recording in Canvas?

1. Log on to Canvas
2. Open the course
3. Open Modules
4. Press the “+” button under the module you plan to add the recording to
5. Add “File”
6. Select “New File”
7. Then select your recording from the folder you saved it to
8. Press “Add item”
9. This will take a minute to load
